Manage your **Fuel Supply** from **Procure-to-Pay**

VERIDAPT's AdaptFMS, the leading hydrocarbon management platform in rail and mining, delivers a single IoT platform solution for mobile and fixed refueling.

Seamlessly integrating Direct-To-Locomotive and fixed infrastructure fueling, AdaptFMS enables your business to control the entire fuel supply chain from supplier orders to locomotive refuelling, including associated emissions per asset.

Single Platform Mobile and Fixed

Integrate with Enterprise IT Systems
(ERP, spot pricing, asset management)

▲

VERIDAPT **Platform**
Reconcile daily / monthly, discover anomalies, handle disputes / administer supply contracts, verify deliveries, upload goods receipts, track emissions per locomotive.

Implement DTL via Phone App

Integrate Existing Sensors on Fixed Fueling via Data Transfer

Upload Documents and BOLs

About **VERI**DAPT

VERIDAPT's real-time technology already monitors, controls and authorises the use of over 1.5 billion gallons of fuel annually, across 80+ large global mining and rail operations. Our clients include top tier commodity producers BHP, Rio Tinto, Glencore, Vale, Teck, Syncrude, Aurizon, Pacific National and other major rail companies.

Award winning **VERI**DAPT has been leading the world in hydrocarbon management for over 18 years. It is built on our rugged hardware and enterprise software application that has been specifically designed to fit any size mining or rail business.

Solutions to Manage, Control and Reconcile your Fuel

VERIDAPT's goal is to digitise and automate the mobile refueling workflow to ensure transparent accounting and reconciliation of every transaction in even the most remote and unsupervised areas.
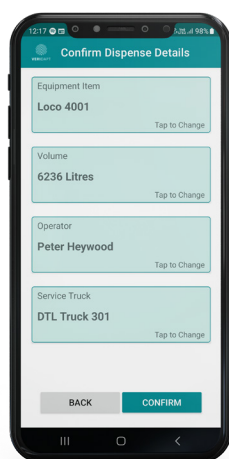

Deploying a combination of hardware, mobile apps and software applications, our propriety inventory monitoring and management platform automates the Procure-to-Pay process and provides real-time verification of deliveries, dispense and transfer of inventory.

**On-board** your fuel supplier, issue purchase order, select driver.

Identify and upload images of locomotive IDs.

Upload details, **verify** against invoice, post to pay.

Measurement and verification for **GHG reduction initiatives through 2030** and beyond

Ensure your decarbonisation strategy is fully supported by the measurement and verification platform, which tracks your decarbonisation projects and measures your actuals vs planned.

Automatically track fuel dispenses into each locomotive including product mix information for blended biofuel and/or renewable diesel.

Value Add Services

- Manage and Facilitate Fuel Supply Contracts to Fixed Fueling Sites
- Manage Fuel Supply Contract for Direct-To-Locomotive purchase orders
- In-yard Direct-to-Locomotive Service Truck Productivity
- Fixed Infrastructure Productivity
